

Shooting Class Defined

Squirrel Rifle Class

Lever action – Pump action – Semi-auto ONLY

Any unmodified factory rifle having its original barrel, stock and trigger, chambered for the .22 LR cartridge meeting the following criteria is permitted.

No aftermarket barrels - No barrel attachments - No benchrest adapters

No limit on scope magnification

Exclusions: 1] Factory triggers may be modified but not replaced 2] Factory barrels may be set back, cut back, rechambered, and/or re-crowned, but must retain visible factory markings 3] Original factory stocks may be action glass bedded 4] Barrels may be free floated 5] Sling swivel studs may be removed

Unmodified factory rifle and scope without or with any exclusion(s) shall not weigh more than 8-1/2 pounds.

Bi-Pods when attached, must be included in the overall weight of 8-1/2 pounds.

Two piece (front/rear) rests or Bi-Pod are used in this class– Front/rear rests shall not be attached. Front and rear rests may be adjustable for elevation and windage.

Two piece rests shall not be attached

Rests or Bi-Pod may be placed upon a shooting bench but not attached.

Unmodified rifles may be shot as a single shot, fed from a magazine or tube.
